## SKILLS

### Data Science & ML

Pandas, NumPy, Scikit-learn, PyTorch, XGBoost, SBERT

### Data Visualization

Power BI, D3.js, Matplotlib, Seaborn, Plotly, Streamlit

### Data Engineering

Azure, Databricks, PySpark, SQL, SSIS, ETL

### Development

Python, Java, JavaScript, Django, Flask, Node.js

### Web

Angular, React, HTML, CSS, REST API

### Tools & Methods

Git, Jira, Agile/Scrum, Docker

## LANGUAGES

### Arabic

Native speaker

### French

Fluent — C1

### English

Fluent — C1

## INTERESTS

Sports  
Volunteering

Master's student in Data Science passionate about machine learning, data analysis and visualization, and leveraging Big Data. Solid background in web and software development. Combines analytical rigor with technical creativity to design innovative solutions from complex datasets.

## EDUCATION

### Master's Degree in Data Science

University of Namur — Namur, Belgium

Sep. 2024 — Jun. 2026

### Bachelor's Degree in Computer Science

University of Namur — Namur, Belgium

Sep. 2021 — Jun. 2024

### Specialized Technician Diploma — Mining & Quarrying

Marrakech Institute of Mines — Marrakech, Morocco

Sep. 2017 — Jun. 2019

## PROFESSIONAL EXPERIENCE

### Research Intern — Master's Thesis

University of Namur — Namur, Belgium

Feb. 2026 — Jun. 2026

- ▶ Developed an **SBERT Embedding + XGBoost** solution to prioritize and select tests on **Odoo 19.0** (36,879 tests, 246 modules)
- ▶ **APFD score of 0.94** vs 0.50 baseline — **+88% gain** in early fault detection
- ▶ Engineered **24 ML features** with **leave-one-out temporal validation** on **30 real commits** — training on 29 commits, testing on 1 (Sep. 2025 — Mar. 2026)

**Tech:** Python, PyTorch, Scikit-learn, SBERT, XGBoost, Git

### Developer — Multilingual Translation System

HMS Networks — Belgium

Feb. 2025 — Jun. 2025

- ▶ Built a back-office enabling **developers** to automatically tag web content with i18n labels, eliminating language constraints on the code side
- ▶ Integrated the **Lokalize API** to synchronize new keys in real time with the marketing team, removing developer involvement in translations
- ▶ Active participation in **Agile** rituals (stand-up, sprint planning, retrospective) tracked via Jira

**Tech:** Angular, JavaScript, i18n, Lokalize API, Jira, Agile/Scrum

## KEY PROJECTS

### NYC Taxi Analytics — End-to-End Data Engineering

2025

- ▶ End-to-end pipeline on **Azure Data Lake** and **Databricks** with **Bronze/Silver/Gold** architecture
- ▶ **Star-schema** modeling and interactive Power BI dashboard (geographic, temporal, and weather-based analytics)

**Tech:** Python, PySpark, Azure, Databricks, Power BI

### Fraudsters Detection — Revolut Challenge

2025

- ▶ Banking fraud detection: feature engineering on transactional patterns, comparison of **Logistic Regression, Random Forest, Gradient Boosting** (Accuracy, Precision, Recall, F1, ROC-AUC)
- ▶ **Streamlit** app deployed with prediction & visualization pages

**Tech:** Python, Scikit-learn, XGBoost, Streamlit

### Seekr — Cultural Exploration App

2025

- ▶ Full-stack application guiding users to **105 hidden artworks** in Namur via real-time GPS and **Mapbox 3D** map, with **nearest-neighbor** routing, discovery zone (50/100m), photo-upload validation and 1-5 star rating
- ▶ **Admin Data Science panel:** **K-Means clustering** of artworks, exploratory **EDA**, and prediction models (**Ridge regression**), with personal statistics dashboard (ECharts)

**Tech:** Python, Flask, SQLAlchemy, Scikit-learn, Mapbox GL JS, ECharts, SQLite

### Galaxy Classification — Deep Learning (CNN)

2026

- ▶ Automatic classification of galaxies into **10 categories** using a convolutional neural network trained on **15,000 images** (data augmentation, normalization, train/val/test split)
- ▶ Full pipeline: EDA, preprocessing, CNN architecture, hyperparameter tuning, and Kaggle submission

**Tech:** Python, PyTorch, CNN, Kaggle

## CERTIFICATIONS

- ▶ **Supervised Machine Learning: Regression** — IBM / Coursera
- ▶ **Introduction to Software Engineering** — IBM / Coursera
- ▶ **Django Application Development with SQL and Databases** — IBM / Coursera
